EXAMINER 'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel R. McClure on 01-04-06.

The application has been amended as follows:

In the claims:

Claims 10, 20, 29, and 32 are canceled.

Claim 9, line 7, after "signals", insert ---, wherein the switching system comprises a plurality of switches ---.

Claim 11, line 1, "claim 10" has been changed to --- claim 9 ---.

Claim 17, line 3, delete "and".

Claim 17, line 4, after "inputs", delete ".", insert --- ; (next line)

(d) receiving a number of data select signals;

(e) choosing at least half of the received data select signals; and

(f) outputting the chosen data select signals. ---

Claim 21, line 1, "claim 20" has been changed to --- claim 17 ---.

Claim 22, line 1, "claim 20" has been changed to --- claim 17 ---.

Claim 23, line 1, "claim 20" has been changed to --- claim 17 ---.

Claim 27, line 3, delete "and".

Claim 27, line 4, after "inputs", delete ".", insert --- ; (next line)

means for receiving a number of data select signals;

means for choosing at least half of the received data select signals; and

means for outputting the chosen data select signals. ---

Claim 30, line 1, "claim 29" has been changed to --- claim 27 ---.

Reason for Allowance

2. Regarding claims 1-8, the prior art fails to teach or suggest a switching system comprising a multiplexer (MUX) configured to receive at least two data input signals and one of the at least two select signals, the MUX further configured to generate a data output; a flip flop configured to receive the data valid signal and release the data valid signal in response to the rising edge of the clock signal; and a second flip flop configured to receive the data output and release the data output in response to the rising edge of the clock signal, in combination with other limitations, as specified in the independent claims 1, 2, 3, and 4.

Regarding claims 9, and 11-15, the prior art fails to teach or suggest a system comprising a switching system configured to receive the data select signals and the data inputs, the switching system further configured to produce a data valid signal in response to the received data select signals, the switching system further configured to generate a data output from the data inputs in response to the data select signals, in combination with other limitations, as specified in the independent claim 9.

Regarding claims 16, and 26, the prior art fails to teach or suggest a switching method comprising the step of choosing at least half of the received data inputs and at least half of the received data select signals, wherein the chosen number of data inputs and the chosen number of data select is the same, wherein the at least half of the received data inputs and at least half of the received data select is a power of 2, in combination with other limitations, as specified in the independent claim 16, and 26.

Regarding claims 17-19, 21-25, 27-28, and 30, the prior art fails to teach or suggest a method comprising the steps of receiving a number of data select signals, choosing at least half of the received data select signals, and outputting the chosen data select signals, in combination with other limitations, as specified in the independent claim 17, and 27.

Regarding claim 31, the prior art fails to teach or suggest a switch comprising means for receiving at least two select signals, means for generate a data valid signal from the at least two select signals, and means for generating a data output from the at least two data input signals in response to the one of the at least two select signals, in combination with other limitations, as specified in the independent claim 31.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
